EUROPEAN FISH PRICE REPORT

15 September 2002 – No. 09/2002

LATEST TRENDS IN THE EUROPEAN MARKET

GROUND FISH: Page 3

FLATFISH: In August, farmed turbot sales have been lower than expected and demand should decrease further in September. Prices of wild turbot are low and are expected to bring farmed product prices down by the end of this month..... **Page 5**

TUNA/PELAGICS: In August, the tuna fishing situation in the Indian Ocean has been quite good (particularly for skipjack) with, however, a reduction of volumes compared to July and a collapse of the yellowfin share of landings. Due to very attractive prices offered by Thai canners, the Indian Ocean skipjack surplus has been diverted to Bangkok by French and Spanish fleets. On the other hand, catches in the Atlantic Ocean have been good for yellowfin and rather poor for skipjack. In the Western Pacific Ocean, catches are improving slightly. On the European market, skipjack prices are decreasing while yellowfin prices are on an upward trend due to a lack of offers **Page 7**

MACKEREL/HERRING: The new mackerel season has started with a high share of large fish landed. Demand is quite good (particularly from the Far East and the Russian Federation) since stocks are low in most markets. Norwegian prices are roughly at last year's level, however due to the strong Norwegian Kroner, sale prices are high. The market for herring is very quiet at the moment..... **Page 7**

CEPHALOPODS: Squid catches and supplies continue to be very limited while demand on the European market is rather high. The shortage is mainly due to the very low supplies from the South West Atlantic. Prices have increased on all markets by 10-15%. The octopus market is returning to normal. The oversupply situation experienced in recent years has come to an end. Octopus prices while still low are showing signs of improvement. Similarly, the cuttlefish market is improving..... **Page 8**

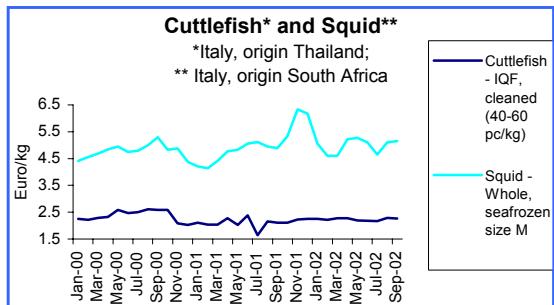

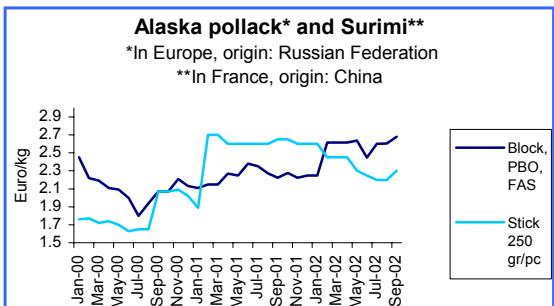

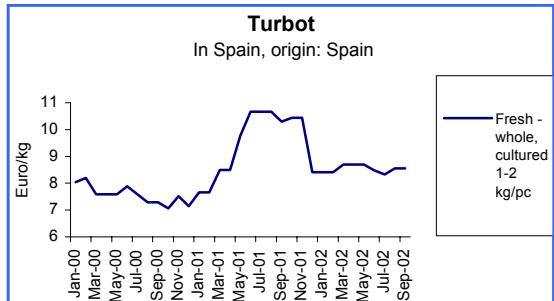

SHRIMP: European shrimp markets, particularly those dependent on Asian supplies, remain unsettled with product availability an ongoing concern. The strict EU testing procedures for shrimp of Asian origin is having the effect of reducing supplies from this region and maintaining some upward pressure on the price of Asian shrimp. Average import prices in the main European shrimp markets followed an upward trend during the first half of this year..... **Page 9**

LOBSTER: The Canadian lobster fall season started a month ago and the whole frozen production is rather low as is usual for the fall season, with lobster going mainly for meat and raw tails **Page 9**

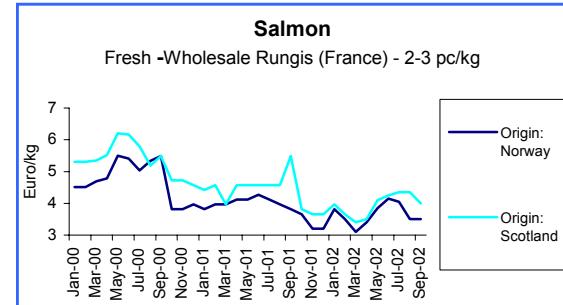

BIVALVES/NON TRADITIONAL SPECIES: **Page 11**

Workshop on "Technology, Quality and Marketing of Value-added Fishery Products"

SHARK/FRESHWATER FISH: As reported by *Aquacultuur* the Dutch catfish producing sector is now entering a deep crisis with prices paid to farmers by processors at less than Euro 0.50/kg (while cost price is almost Euro 1.00/kg). The main reasons for this situation are high competition between processors, demand reduction from Germany and the rapid increase of production over the last few years. Prices are expected to further decrease to Euro 0.30 in October and after the shake-out, which will take place if no agreement between processors can be found, the sector expects to reach, sometime next year, a off-farm price of Euro 1.25..... **Page 11**

SALMON/TROUT: Norway's salmon export statistics for January-August 2002 (8 months) show a 6.1 % increase in volumes to 213 000 tonnes but a decline in value of almost 10 % to 6.6 billion NOK. Exports to Norway's main market, the EU, showed a slight volume increase to 170 762 MT (round weight). Most exporters believe prices will see a moderate rise of 2-3 NOKs during autumn and early winter and with further increases next spring. Current prices are influenced by abundant supplies and forced sales to accommodate bankers and feed suppliers. In addition, quality problems have added hurt to injury for some farmers. It also looks as if the European Commission and Norwegian authorities will agree to extend the EU-Norway salmon agreement until 28 February 2003. The EC needs this extension to complete the investigations in to Norwegian, Chilean and Faroese pricing policies in the European market. The minimum import prices will remain in effect in any case and the only effect of a possible Norwegian rejection of extending the agreement is that the mandatory levy on salmon exports will disappear..... **Page 12**

SEABASS/SEABREAM: Both demand and supply for seabass and seabream are high at the moment and prices are almost stable..... **Page 12**

The European Fish Price Report is a monthly publication. (Compiled by Karine Boisset, GLOBEFISH)
